

Deborah Anne Golino

*Department of Plant Pathology, Foundation Plant Materials,
University of California, Davis*

Dr. Golino is the Director of Foundation Plant Materials Service Department, College of Agricultural and Environmental Sciences; and Extension Specialist, University California, Davis, Ca. Since the fall of 1994, she has been Director of Foundation Plant Services (FPS). FPS is dedicated the distribution of disease tested, true to identity plant materials produced by UC researchers or improved by technology developed by UC researchers. At this time, FPS is responsible for programs for grapes, strawberries, fruit trees, nut trees, roses, and sweet potatoes. These programs have played a key national and international role in distributing new crop varieties and healthy planting stocks. FPS is an unusual department in the College of Agricultural and Environmental Sciences at UC Davis because its mission is service and the unit is entirely self-supporting.
