

**Kevin Usher**

*Research Scientist*

*Agriculture and Agri-Food Canada/Agriculture*

*Pacific Agri-Food Research Centre (PARC)*

Kevin Usher received his Ph.D. in plant biochemistry from the Department of Botany at the University of British Columbia in 2001. He studied physiology and biochemistry of medicinal plants with an emphasis on environmental factors influencing plant secondary metabolism. In 2001 he began a Postdoctoral Fellowship at the Pacific Agri-Food Research Centre in Summerland working on biochemistry of wine grapes. Kevin Usher became a term research scientist at PARC in 2004 and became permanent in November 2006. His current research focus is the biochemistry of grapes and wine toward improving wine quality.
