

Table of Contents

1. Introduction	1-1
2. Grapevine Development and Basic Physiology	2-1
The Goals of Viticulture	2-1
Basic Physiology	2-1
Vine Development	2-2
Effects of Vine Injury	2-4
3. Vineyard Establishment	3-1
3.1 Site Selection	3-1
Climate	3-1
Minimum Site Requirements for the Planting of <i>Vitis vinifera</i>	3-1
Solar Radiation	3-1
Growing Degree Days	3-2
Precipitation	3-2
Slope	3-2
Elevation	3-2
Wind	3-3
Water	3-3
3.2 Soils	3-6
Soil Survey	3-6
Soil Amendments	3-6
Land Preparation	3-6
Site Development	3-7
Row Direction	3-7
Vine Spacing	3-7
3.3 Planting Grapevines	3-8
3.4 Variety and Rootstock Selection	3-9
Grape Variety Descriptions	3-10
Rootstock Description	3-20
3.5 Trellis Systems	3-24
Trellis Design	3-24
Training Systems	3-24
Vertical Shoot Position System	3-25
Scott Henry System	3-27
Horizontally Divided Canopy System	3-27
Wide T Trellis System	3-27
Posts and Wire	3-28
Anchor Systems	3-28

4. Vineyard Maintenance	4-1
4.1 Maintaining Young Vines	4-1
Vine Rejuvenation	4-1
4.2 Canopy Management for Pacific Northwest Vineyards	4-2
Definitions of Canopy Components	4-2
Goals of Canopy Management	4-4
Light and Temperature Effects of Canopy Manipulations	4-4
Canopy Assessment Methods	4-6
Techniques for Canopy Manipulations	4-6
Methods to Improve Fruit Exposure	4-10
The Ideal Canopy	4-11
Concluding Remarks	4-11
References and Useful Literature	4-12
Pruning	4-13
Cane Pruning	4-13
Spur Pruning	4-13
4.3 Nutrition	4-14
Soil Management	4-14
Erosion Control	4-15
Organic Matter	4-15
Non-Nutritional Causes of Low Vine Vigour	4-16
Fertilizers and Mineral Elements	4-17
Plant Nutrients	4-17
Nitrogen	4-17
Calculation of Fertilizer Rate for Ground Applied Fertilizers	4-19
Magnesium	4-20
Boron	4-20
Calcium	4-21
Zinc	4-21
Iron	4-22
Manganese	4-22
Copper	4-23
Sulphur	4-23
Soil Reaction an Influence of pH Availability of Nutrients	4-23
Lime Applications to the Soil	4-23
Soil Acidification	4-24
Fertigation	4-24
Petiole and Soil Analysis	4-26
Variety Vigour	4-27
Soil Analysis	4-27
Soil Testing Philosophies	4-27
Soil Sampling Methods for Vineyards	4-28
Compatibility Chart	4-29
4.4 Irrigation	4-30
Water Management Principles and Practices for Vineyards	4-30
Seasonal Water Requirements - Phenology and Climatic Conditions	4-31
Soil Type and Plant-available Moisture	4-32

Irrigation During Vineyard Establishment	4-32
Irrigation Scheduling Methods	4-33
Deficit Irrigation Methods	4-35
Water Management for Table Grapes	4-36
4.5 Vineyard Floor Management	4-37
Types of Floor Management Systems	4-37
Benefits of Utilizing Cover Crops in Vineyards	4-37
Potential Problems	4-38
Using Floor Management Wisely	4-38
Cover Crop Choices and Their Management	4-39
Cover Crop Selection	4-39
References and Useful Resources	4-43
Seed Sources	4-44
4.6 Frost Protection	4-45
Considerations for Protecting Grapevines from Low Temperature Injury	4-45
Introduction	4-45
General Cold Temperature Protection Strategies	4-47
Passive Frost Protection Strategies	4-48
Active Frost Protection Strategies	4-53
Conclusions	4-60
Literature Cited	4-62
4.7 Crop Estimation	4-64
Overview	4-64
Determining the Number of Vines per Acre and per Block	4-64
Determining the Number of Bunches per Vine	4-65
Predicting Harvest Bunch Weights	4-65
Historic Bunch Weights	4-65
Lag Phase Weights and Factors	4-66
Berry Number Averages	4-67
5. Crop Protection	5-1
5.1 Integrated Pest Management	5-1
Pest Prevention	5-1
Identification of Damage, Pests and Natural Enemies	5-1
Monitoring	5-2
Control Decisions	5-2
IPM Control Methods	5-3
IPM Record Keeping and Evaluation	5-3
5.2 Grape Diseases	5-4
Disease Diagnosis	5-4
Grape Powdery Mildew	5-4
Botrytis Bunch Rot of Grape	5-9
Grape Sour Rot	5-12
Crown Gall of Grape	5-13
Grape Virus Diseases	5-14
What is a Virus	5-14

General Virus Symptoms	5-14
Importance of Virus Diseases	5-14
How Viruses are Spread	5-14
Control and Prevention of Viruses	5-15
Clonal Selection	5-15
Major Grape Virus Diseases	5-15
Grapevine Fanleaf Virus	5-16
Grapevine Leafroll-Associated Virus	5-16
Arabis Mosaic Virus	5-16
Rupestris Stem Pitting Virus	5-17
Grapevine Phytoplasma Diseases	5-17
Grape Root Rot and Decline	5-19
Young Vine Decline	5-19
Grape Replant Problems	5-21
Grape Nematode Problems	5-21
Other Grape Diseases	5-22
Other Resources for Grape Disease Information	5-22
5.3 Insect and Mite Pests of Grapes	5-23
Integrated Pest Management	5-23
Cultural and Physical Controls	5-23
Monitoring and Chemical Controls	5-24
Major Pests of Grapes	5-25
Leafhoppers	5-25
Cutworms	5-28
Grape Phylloxera	5-31
Wasps	5-33
Minor or Secondary Pests	5-35
Thrips	5-35
Spider Mites	5-36
Grape Erineum Mite	5-39
Grape Mealybug	5-39
Scale Insects	5-41
Snailcase Bagworm	5-42
European Earwig	5-43
Click Beetle	5-44
Miscellaneous Insect Pests	5-45
Blackvine Weevil	5-45
Wood Boring Beetles	5-45
Grasshoppers	5-45
Whitefly	5-45
Cicada	5-46
5.4 Weeds	5-47
Non-chemical Weed Control	5-47
Chemical Weed Control	5-47
5.5 Wildlife Management	5-50
Birds	5-50
Rodents	5-51

Mice	5-51
Pocket Gophers	5-52
Rabbits	5-53
Bears	5-53
5.6 Urban Issues	5-54
Farm Practices Protection (Right to Farm) Act	5-54
Noise	5-54
Pesticides	5-54
6. Organic Production	6-1
Certified Organic Associations of B.C.	6-1
7. Spray Application	7-1
7.1 Pesticides	7-1
Legislation	7-1
Canadian Laws	7-1
British Columbia Laws	7-1
Toxicity	7-2
Poisoning and First Aid	7-2
Protective Clothing and Equipment	7-4
Personal and Environmental Safety Guidelines	7-6
Special Environmental Precautions	7-9
Emergency Response	7-10
Pesticide Application Equipment	7-11
Sprayer Calibration	7-12
Sprayer Calibration Checklist	7-13
Mixing Chemicals	7-15
Maintenance and Operation of Air-Blast Sprayers	7-15
Sprayers Classified According to Volume of Spray Mixture per Acre	7-15
Vineyard Weed Sprayers	7-16
Special Precautions.....	7-16
Pest Control Products Recommended for Use on Grapes in British Columbia	7-17
Sample Spray Record Form	7-21
8. Harvest and Quality Issues	8-1
8.1 Fruit Sampling and Maturity	8-1
Grape Sampling	8-1
Sample Preparation	8-1
Analysis of Total Solids (sugar) in Grape	8-2
Analysis of Acidity in Grape Must	8-2
Analysis of pH in Grape Must	8-3
Analysis of Fermentable Nitrogen in Grape Must	8-3
Grape Seeds	8-4
Grape Colour	8-4
Aroma/Flavor and Phenolic Compounds	8-4
Botrytis Bunch Rot or Sour Rot	8-5
Ideal Noble Rot Characteristics	8-5
Ideal Sour, Grey or Vulgar Rot Characteristics	8-5

Other Visual Observations on Fruit Condition	8-6
Weather	8-7
Historical Index of Ripeness	8-7
Sampling Abnormalities	8-7
Grape Harvest Trivia	8-7
8.2 Harvesting Techniques	8-10
Grape Scheduling	8-10
8.3 Food Safety	8-10
Introduction	8-10
What is a Food Safety Risk	8-10
Ways that Fresh Product May Acquire Food Borne Illness	8-10
Good Agricultural Practices Reduce Food Safety Risk	8-12
9. Farm Regulations, Guidelines and Government Programs	9-1
9.1 Health and Safety in Vineyards	9-1
New Requirements	9-1
New Employee Orientation	9-2
Musculo-Skeletal or Soft Tissue Injuries	9-2
Hazardous Materials	9-2
Machine Guarding	9-2
Contact FARSHA for Assistance	9-3
9.2 Agricultural Employers Guide to the B.C. Employment Standards Act	9-4
Definition of a ‘Farm Worker’	9-4
Employees not Designated as ‘Farm Workers’	9-4
Minimum Wage for Hand Harvesters	9-4
Minimum Wage for Other Workers	9-5
Minimum Daily Pay	9-5
Paying Wages	9-5
Wage Statements	9-5
Record Keeping	9-5
Annual vacation and Vacation Pay	9-5
Statutory Holidays	9-6
Meal Breaks	9-6
Split Shifts and Hours Free from Work	9-6
Overtime	9-6
Compensation for Length of Service	9-6
Use of Farm Labour Contractors	9-6
Young Workers	9-7
Employment of Young People Under 12 Years of Age	9-7
Entry and Inspection Powers of the Employment Standards Branch	9-7
Mandatory Penalties	9-7
Web Sites	9-8
9.3 Farm Practices Protection Act	9-9
Production Insurance	9-9
9.4 Environmental Farm Plan Program	9-10
10. Useful Publications and Web Sites	10-1
